4. Alternatives that are feasible will be evaluated for cost, general environmental impacts, and system reliability concerns in coordination with interested parties.

5. The results of this evaluation will be made available to Western's power customers and the public.

Transmission facilities needed for reliability will be based on mitigating problems related to power system operations or replacing unsafe, aged, worn out, or inefficient equipment.

Western is committed to join the Western Regional Transmission Association and has joined the Southwest Regional Transmission Association (SWRTA). Both groups will promote coordinated planning and efficient use of transmission capacity and will provide another means for involvement by Western's customers. As appropriate, Western can invite other interested parties to attend SWRTA meetings as guests of Western. It is anticipated that some form of regional transmission group will be established in the Mid-continent Area Power Pool. This will also facilitate public involvement in considering Western's future transmission needs.

Public Process

The public process to determine the principles of integrated resource planning that Western will incorporate into its resource acquisition and transmission planning processes begins with publication of this notice.

Comments on these proposed principles are being sought during a 90-day comment period. Following this comment period, the principles to be adopted will be published in the Federal Register. This public process ends with publication of final principles in the Federal Register. Final principles will be effective 30 days after publication.

Environmental Evaluation

Western is seeking comment on the IRP principles outlined in this notice through a public process. Methods, procedures, and criteria for implementing these principles have yet to be developed and will be project-specific. Western is committed to initiating an appropriate public process under NEPA and its implementing regulations for these project-specific actions at the earliest possible time. The potential environmental effects of the methods, procedures, and criteria will be evaluated in addition to analyzing the effects of the acquisition of resources in these subsequent processes.

Determination Under Executive Order 12866

DOE has determined this is not a significant regulatory action because it does not meet the criteria of Executive Order 12866, 58 FR 51735. Western has an exemption from centralized regulatory review under Executive Order 12866; accordingly, no clearance of this notice by the Office of Management and Budget is required.

Issued at Golden, Colorado, November 10, 1994.

J.M. Shafer,
Administrator.

Public Water System Supervision Program Revision for the State of Minnesota

AGENCY: Environmental Protection Agency.
ACTION: Notice.

SUMMARY: Notice is hereby given in accordance with the provision of section 1413 of the Safe Drinking Water Act, as amended, 42 U.S.C. 300f et seq., and 40 CFR part 142, subpart B, the National Primary Drinking Water Regulations (NPDWR); that the State of Minnesota is revising its approved Public Water System Supervision (PWSS) primacy program. The Minnesota Department of Health (MDH) has adopted drinking water regulations for Lead and Copper, 44 synthetic organic chemicals (SOCs), 12 inorganic chemicals (IOCs), and 8 volatile organic chemicals (VOCs) that correspond to the NPDWR for Lead and Copper, SOCs, IOCs, and VOCs, and promulgated by the U.S. Environmental Protection Agency (USEPA) on June 7, 1991 (56 FR 26460-26564), on January 30, 1991 (56 FR 3528-3597), as amended on July 1, 1991 (56 FR 30266-30281), and on July 17, 1992 (57 FR 31776-31849). The USEPA has completed its review of Minnesota's PWSS primacy program revision and has determined that these sets of state program revisions are not less stringent than the corresponding Federal regulations.

The USEPA has determined that the Minnesota rule revisions meet the requirements of the Federal rule. Therefore, the USEPA has determined that these sets of state program revisions are no less stringent than the corresponding Federal regulations and

is proposing to approve the MDH's rule revisions.

All interested parties are invited to submit written comments on these proposed determinations, and may request a public hearing on or before January 5, 1995. If a public hearing is requested and granted, the corresponding determination shall not become effective until such time following the hearing, at which the Regional Administrator issues an order affirming or rescinding this action. Frivolous or insubstantial requests for a hearing may be denied by the Regional Administrator.

Requests for public hearing should be addressed to: Ron Murawski, (WD-17J), U.S. Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604.

Any request for a public hearing shall include the following: (1) The name, address, and telephone number of the individual, organization, or other entity requesting a hearing. (2) A brief statement of the requesting person's interest in the Regional Administrator's determinations and of information that the requesting person intends to submit at such hearing. (3) The signature of the individual making the request; or, if the request is made on behalf of an organization or other entity, the signature of a responsible official of the organization or other entity.

Notice of any hearing shall be given not less than fifteen (15) days prior to the time scheduled for the hearing. Such notice will be made by the Regional Administrator in the Federal Register and in newspapers of general circulation in the State of Minnesota. A notice will be sent to the person(s) requesting the hearing as well as to the State of Minnesota. The hearing notice will include a statement of purpose, information regarding the time and location, and the address and telephone number where interested persons may obtain further information. The Regional Administrator will issue an order affirming or rescinding his determination upon review of the hearing record. Should the determination be affirmed, it will become effective as of the date of the order.

Should no timely and appropriate request for a hearing be received, and should the Regional Administrator not elect to hold a hearing on his own motion, these determinations shall become effective on January 5, 1995. Please bring this notice to the attention of any persons known by you to have an interest in these determinations.

All documents related to these determinations are available for
